It intensifies the activity of the vital processes, provokes increased flesh, stimulates the production of red cor-puscies, contributes to the defense of the system against depletion and consequent exhaustion and in many other ways arouses the functional processes to make you feel that something has touched that one flickering vital spark you thought was about to go out. CATARRHAL DEAFNESS MAY BE OVERCOME

If you have catarrhal deafness or are even just a little hard of hearing, or have head noises, go to your druggist and get one ounce of Parmint (double stiength) and add to it ¼ pint of hot water and a little granulated sugat. Take one table-spoonful four times a day.

This will often bring quick rellef from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone losing hearing or who has catarrhal deafness or head noises should give this prescription a trial.
